Because when it's hot outside you can't beat spritzing on your skincare...

The best part about long summer weekends is that you can pack light—airy dresses, breezy swimsuits, a thin cardigan and you're done. That same thinking can also apply to your beauty haul. Leave behind the clunky creams, bulky oils and complicated cleansing routine for a moment and just rely on a few multi-tasking face mists. The latest formulas seal in moisture, tone down redness, set your makeup and feel amazing on a hot day. Here's how to find your perfect, one-and-done match.

For All-Over Hydration:

This hardworking mist is infused with organic rose extract and aloe vera and is gentle enough to be used pretty much anywhere—on your face, body and even hair. Just FYI, it's a tiny bit over the 3-ounce TSA limit (like a few other picks on this list) so you'll have to check your bag or reserve this bottle for trips that don't involve airports.
